WORK EXPERIENCE

Full Stack Developer

Freelance / Self-Employed | 2019 – Present | Bangladesh (Remote)

- Designed and delivered 50+ production-grade full-stack web applications end-to-end using MERN stack and Next.js.
- Built RESTful APIs with Express.js and Node.js, applying JWT authentication, RBAC, and middleware security layers.
- Developed multi-vendor e-commerce platforms with product management, order tracking, and payment gateway integration.
- Created real-time inventory management systems with live stock alerts, supplier tracking, and multi-role access control.
- Integrated Claude, ChatGPT, and Gemini APIs; engineered prompt strategies for content automation and AI chatbots.
- Migrated JS codebases to TypeScript reducing runtime errors by ~40%; optimized MongoDB queries improving speed by 35%.
- Leveraged Next.js SSR/SSG/ISR for SEO-optimized, high-performance pages with improved Core Web Vitals scores.

KEY PROJECTS

Inventory Management System | MongoDB, Express.js, React.js, Node.js, TypeScript, JWT

End-to-end inventory platform with real-time stock tracking, low-stock alerts, multi-role RBAC (Admin/Manager/Staff), JWT-secured APIs, supplier management, and an analytics dashboard with sales reports and data visualizations.

E-Commerce Platform with Admin Panel | MongoDB, Express.js, React.js, Next.js, Node.js, Redux Toolkit

Full-featured multi-vendor store with product catalog, cart, wishlist, order management, payment gateway, and admin panel for managing products, vendors, customers, and revenue analytics with Next.js SSR for SEO.

Multi-Author Blog System | MongoDB, Express.js, React.js, Node.js, TypeScript, Next.js

Scalable CMS with multi-author workflows, rich text editing, category/tag management, SEO-friendly dynamic routing via Next.js SSG, nested comment system, moderation tools, and author notification features.
